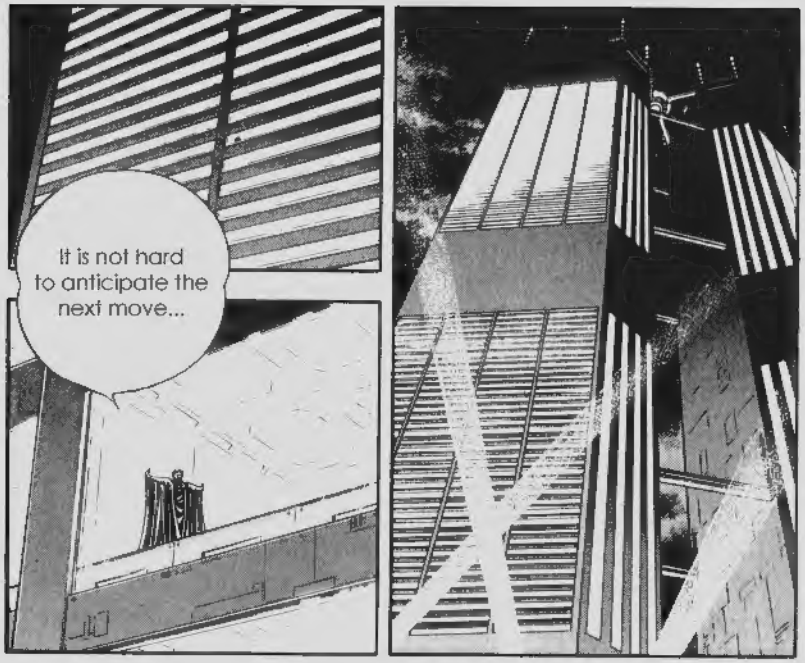
Therefore you should make sure not to neglect the surveillance of the aerial space!
There is a serious danger that the enemy will attack from the sky!

... However it fails to protect us from underground...
I find it difficult to believe that it could break through this surveillance system frontally...

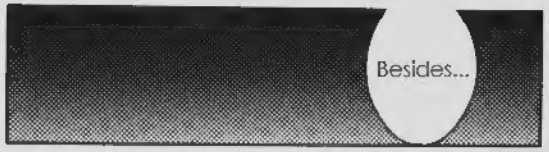
Besides the obvious dangers, there are three Zoalords ready to greet you!
... To help your friend Aptom...
Sho Fukamachi... I wonder if you are seriously willing to risk your life...



It is not hard to anticipate the next move...

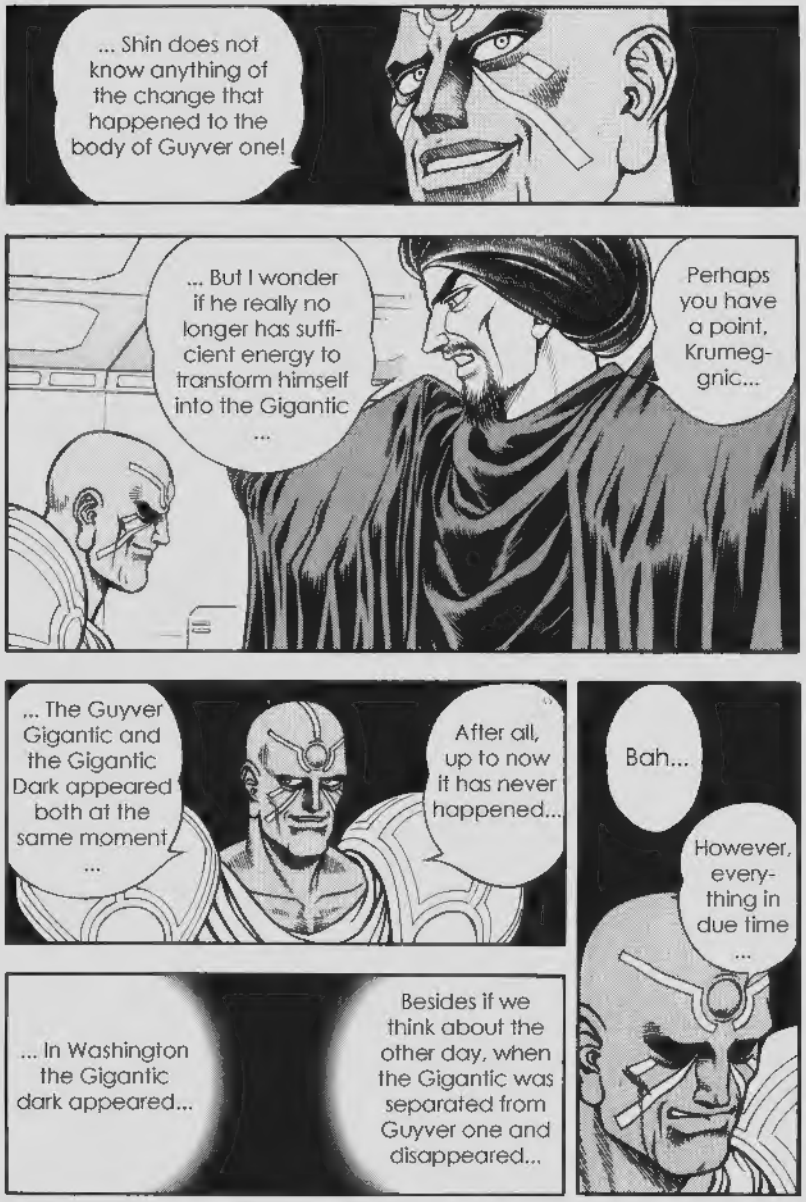
But this building, in the past, has already supported an attack from the Gigantic...
... And it is not difficult to allow Shin to anger himself...

Of course... If we think about what has happened in Washington...

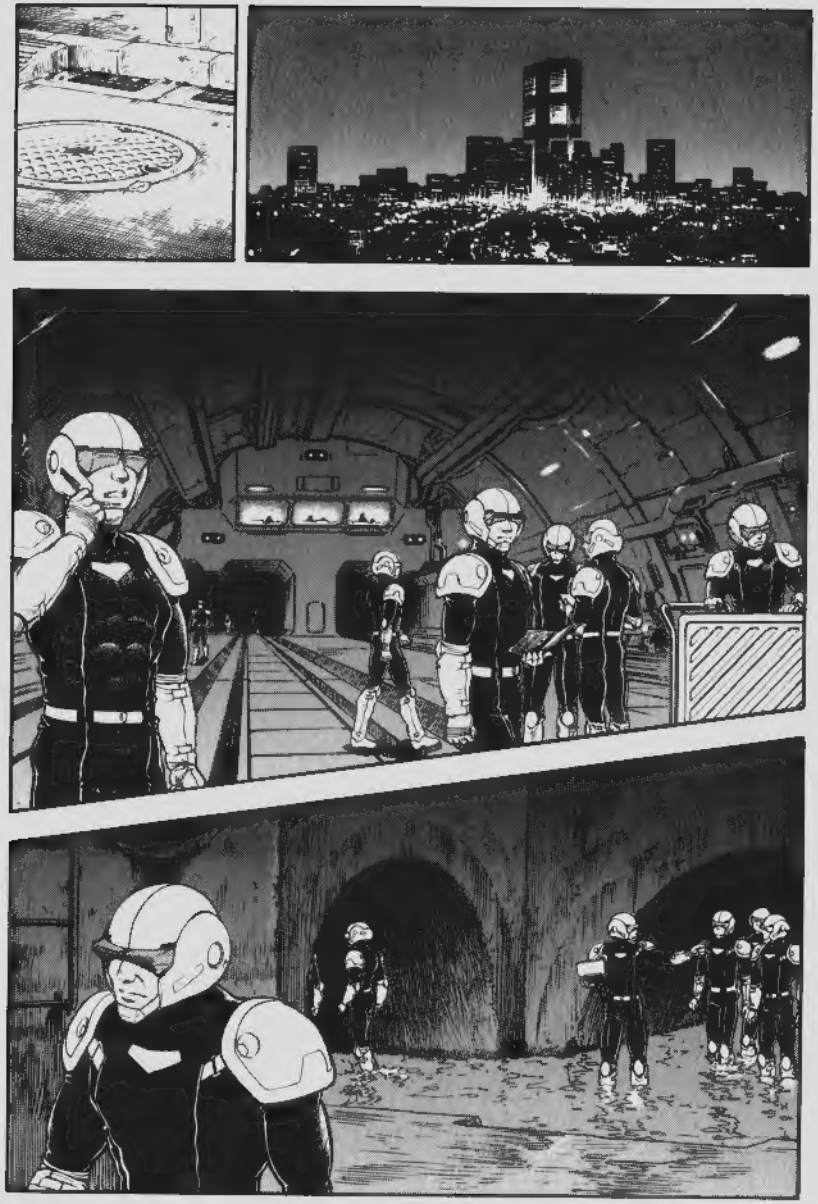


Besides...

The two Guyvers have been alternating between them...
!!
But what does all this mean?!
... You mean that there only exists... a single Gigantic?!
It can't be...
... And at the same time control was passed to Guyver three...
It can be deduced from the time that Guyver one lost control...
It is likely...
... Between the two Guyvers, at the present time, there is absolutely no signs of collaboration!
Besides there is further evidence...



... Shin does not know anything of the change that happened to the body of Guyver one!
... But I wonder if he really no longer has sufficient energy to transform himself into the Gigantic ...
Perhaps you have a point, Krumeggnic...
... The Guyver Gigantic and the Gigantic Dark appeared both at the same moment ...
After all, up to now it has never happened...
Bah...
However, everything in due time ...
... In Washington the Gigantic dark appeared...
Besides if we think about the other day, when the Gigantic was separated from Guyver one and disappeared...

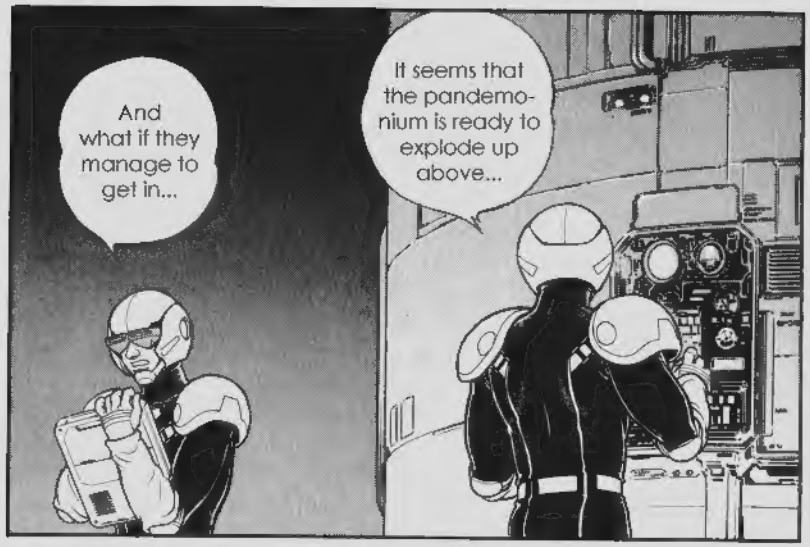


... Or rather, it seems to me that he actually betrayed him ...
Agito Makishima left Sho Fukamachi...
But why...
... And now he has no further need for the abilities of Guyver one...
Agito is starting to broaden the influence of his organization's military step by step...
We should gather all of our resources...
Trust me...
... this is a rare opportunity for us...
... To uncover this mystery!

But our objective is found even deeper still...
... In the deepest under-ground levels...

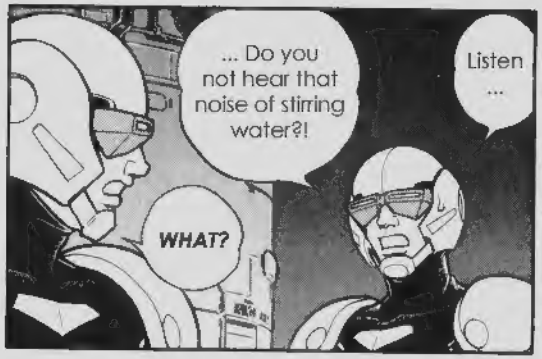
We will burst into Cloud Gate from there!

So they were ex-pecting us...
I'm sensing that they are waiting for us even in the sewer systems...



And what if they manage to get in...
It seems that the pandemonium is ready to explode up above...

WAIT!
Not even one such as the Guyver could penetrate this location...



... Do you not hear that noise of stirring water?!
Listen ...
WHAT?

Here we are at around two hundred meters under sea level...
... Besides There is no passage-way from the outside to here..

THE BEGINNING OF THE CARNAGE!
Guyver Advocacy

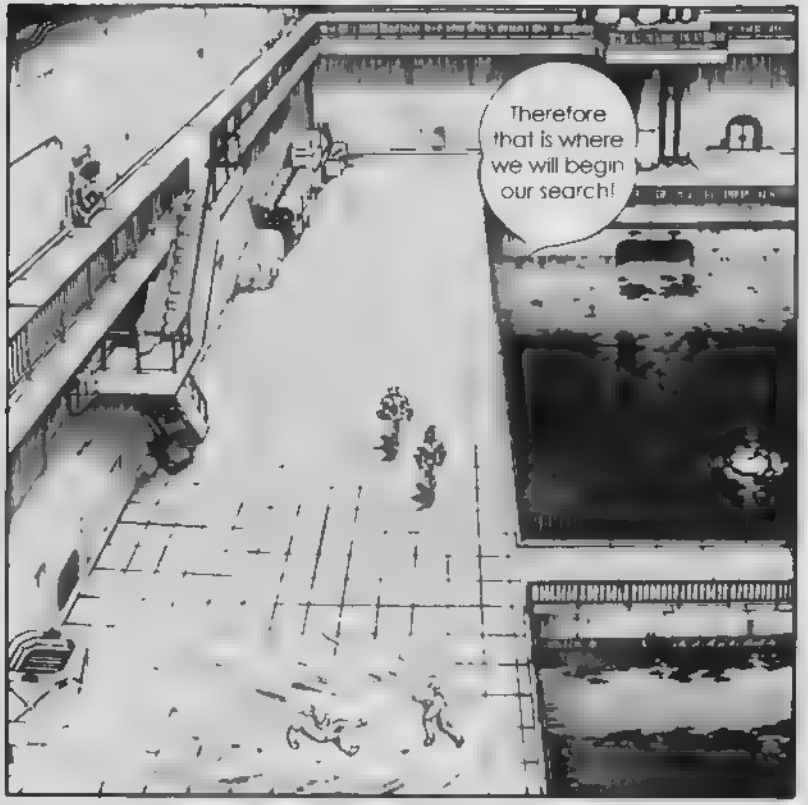
Eh?.
Who .. Who the devil is th's?.
I am unable to Move
My body...
I'm be'ng frozen

As we both assumed, this place was insufficiently protected...
Uhm...
This seems too easy
It's probable that none of the heads imagined that we would enter from such a low level!
How did you know?
However it is incredible that they managed to create a reservoir like this two hundred meters underground!

always knew the plans for the skyscrapers...
I had the technical plans for Cloud Gate printed in the head
From quite some time ago.
When I was at Relics Point remember that I looked at the plans file more then once...
Would have become useful in a time like this!
never have imagined that that knowledge
... Therefore, above that, must be the laboratory for the processing experiments..
Well above us is the the installation area where the Electrical power is supplied

.....
You mean to tell me that Hayami and Sho went together to Cloud Gate
So

But that s with out a doubt the place where we wil have the best possibility of find ing him..
I do not know
I wonder if Aptom is really there



Therefore that is where we will begin our search!

... Certainty, There is that ...
... Rather then Sho going alone...
However, it is better this way..
It also prevents the rash decisions of Sho .
Tetsuro?!

I don't think that anything could have prevented Sho from going to help Aptom...
Therefore I should admit the fact that someone like Hayami joining him on this mission, is the best thing that could happen...
.....
NEVERTHELESS ..
... WHY DID HAYAMI WILLINGLY LET HIM GO?

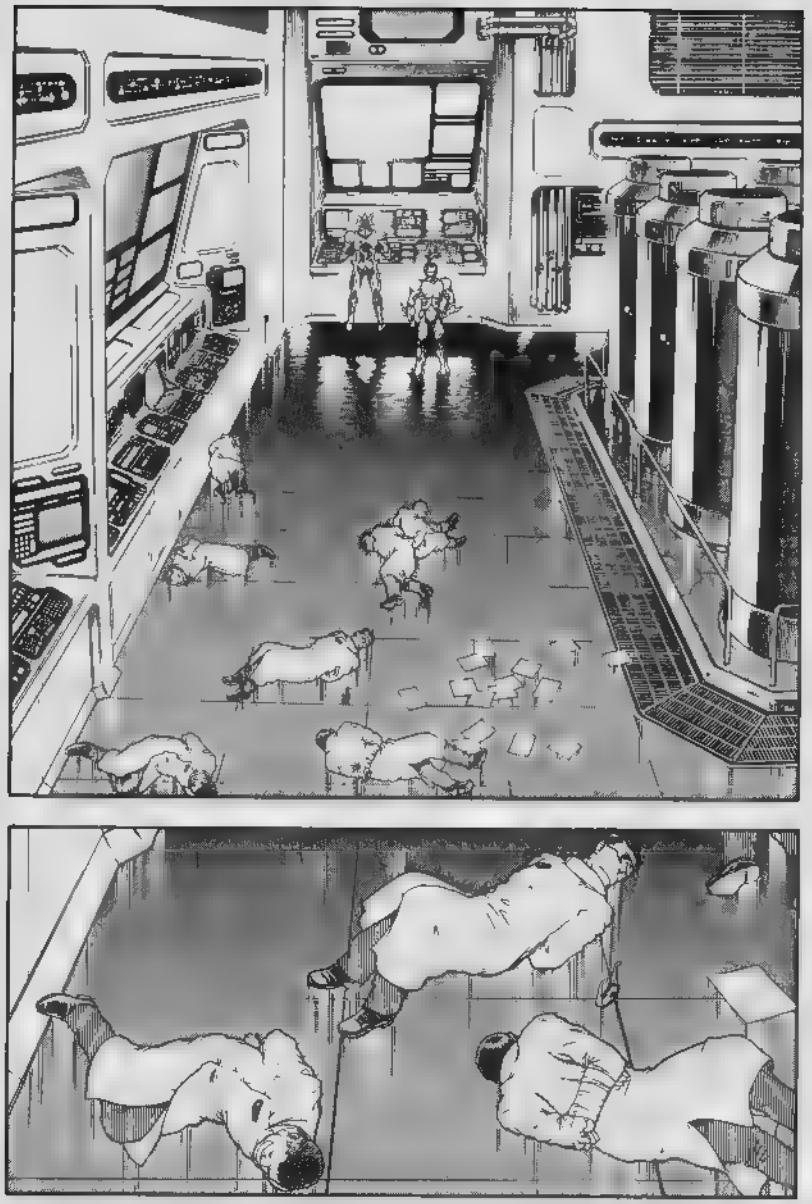
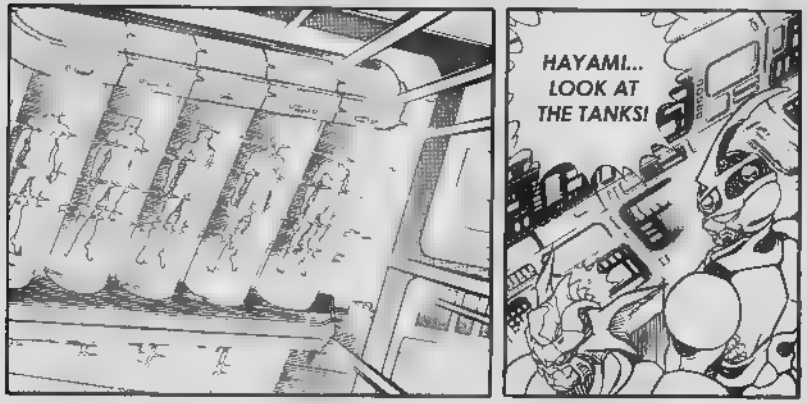
Alarm system is now off
They will not be able to see what is happening...
So even if someone attempts to view the area
Hold on
To get a focus on him I need to concentrate
can you sense the presence of Aptom anywhere nearby?
Sho

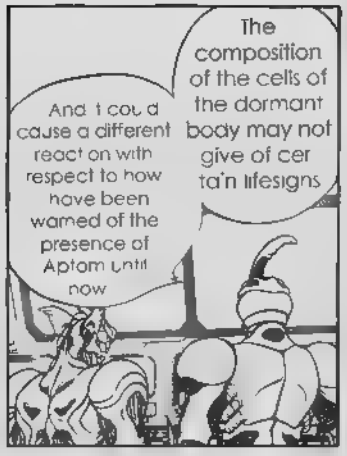


!!

WHAT THE DEVIL DID YOU DO?!



HAYAMI... LOOK AT THE TANKS!

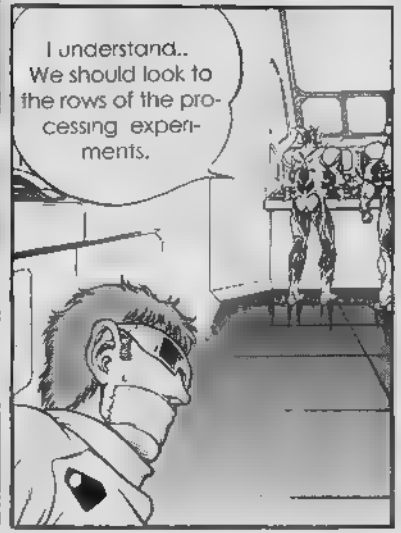


And it could cause a different reaction with respect to how have been warned of the presence of Aptom until now
The composition of the cells of the dormant body may not give of certain lifesigns

... You think that he is not here..
In other words..

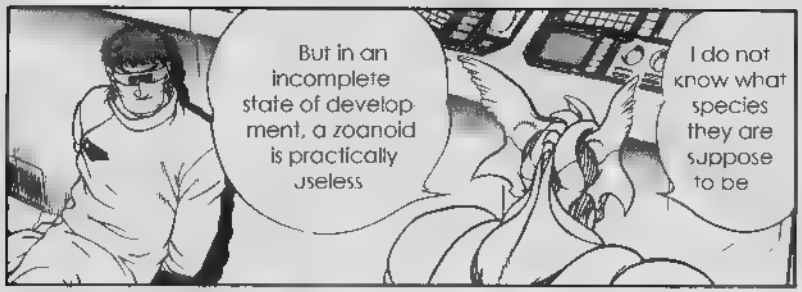
Perhaps it is because the head sensor of the Guyver cannot recognise him ..
No, but

Very well.



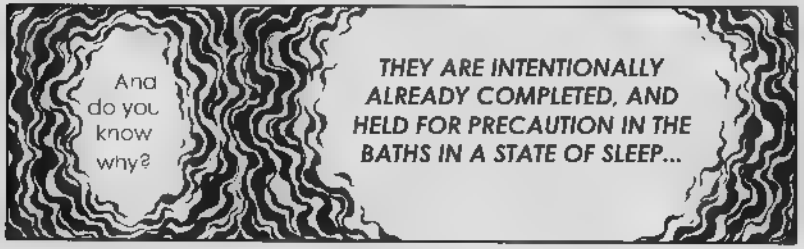
I understand.. We should look to the rows of the processing experiments.

Guyver Advocacy



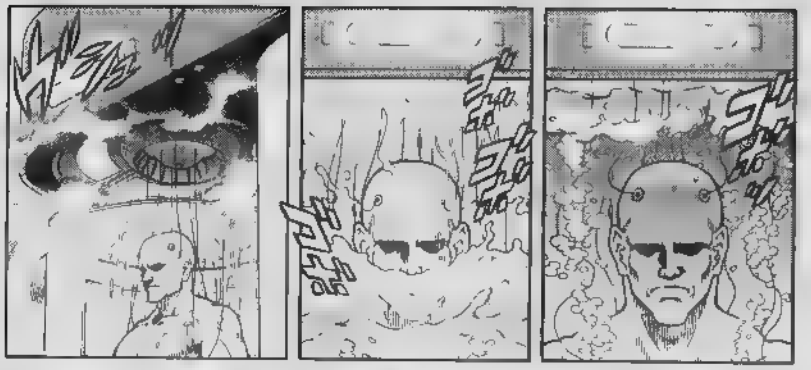
But in an incomplete state of development, a zoanoid is practically useless
I do not know what species they are suppose to be

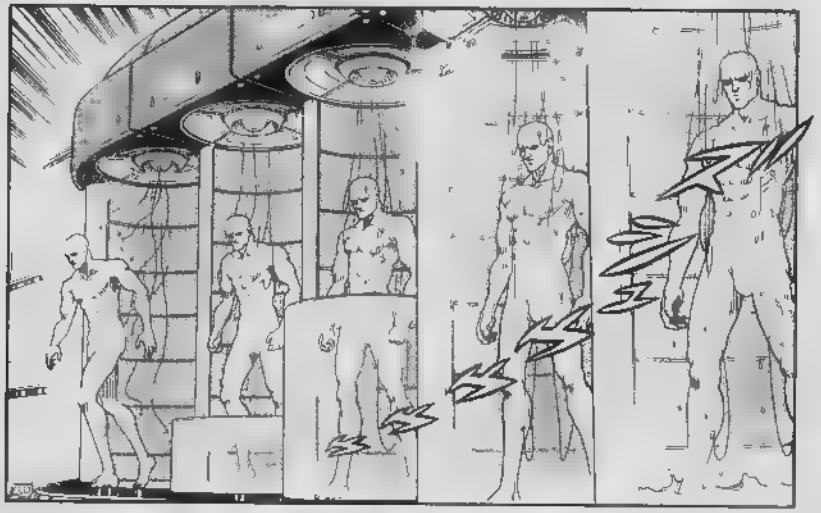
But those are very different
Yes... a common example



And do you know why?
THEY ARE INTENTIONALLY ALREADY COMPLETED, AND HELD FOR PRECAUTION IN THE BATHS IN A STATE OF SLEEP...

... they also possess a high metabolic rate and an incred'ble power and ag'lity
While their longevity is greatly inferior with respect to that of any other zoanoid





It is an unheard of thing
But how is it possible to expel the still incomplete zoanoid from the baths?!

BUT THESE ARE...

Not only do these exemplary models not require any warming but also no mission objective
because within them
IN ACTION THEY ACT LIKE A SAVAGE DOG!
... THEY ARE ALREADY INFUSED WITH A SENSE OF SINGLE MINDED AGGRESSION!
AND THEY ALREADY HAVE THEIR SIGHTS ON US!
THEY ARE TRANSFORMING!

HOW COULD THIS HAPPEN?!
BUT THIS ISN'T POSSIBLE?!
KYAAA!
GWAA!!!

However
THE HEAD BEAM HAD VIRTUALLY NO EFFECT...

.. Therefore perhaps if I keep them occupied ..
The weakness of these monsters is their limited lifespan

As usual.

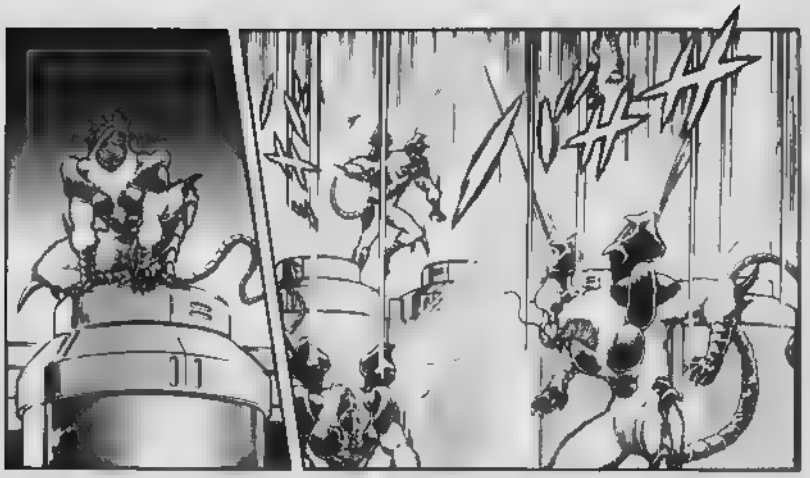
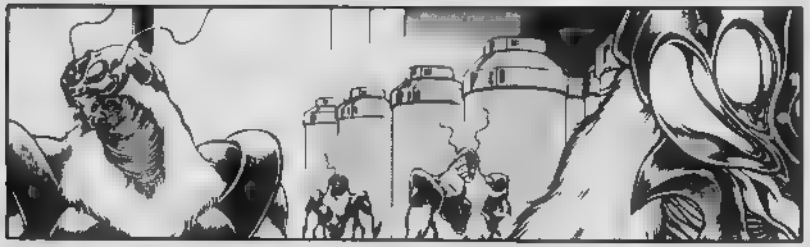
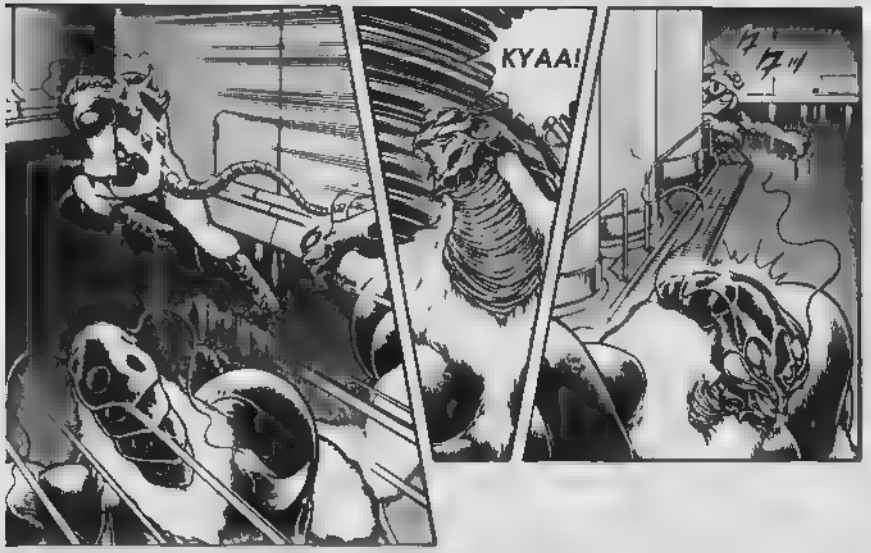
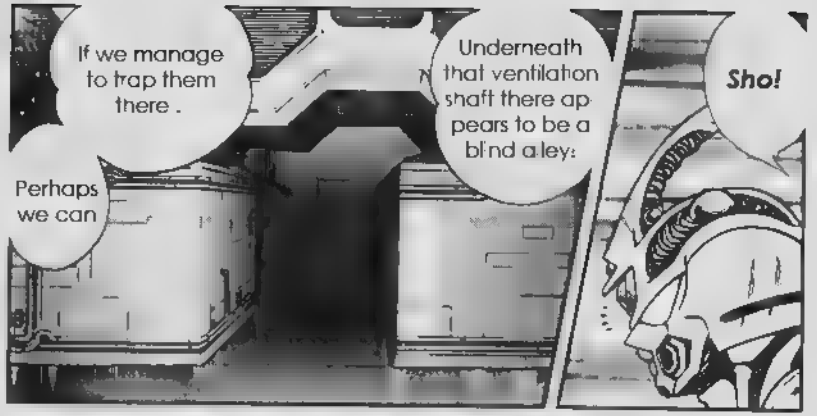
. . The wound 's burn'ng .. It must be because of the decom- pos'tion of the enzy mat'c fluid.
How terrible ..







KYAA!



If we manage to trap them there .
Perhaps we can
Underneath that ventilation shaft there appears to be a blind alley.
Sho!

I UNDERSTAND! LETS GO FOR IT!

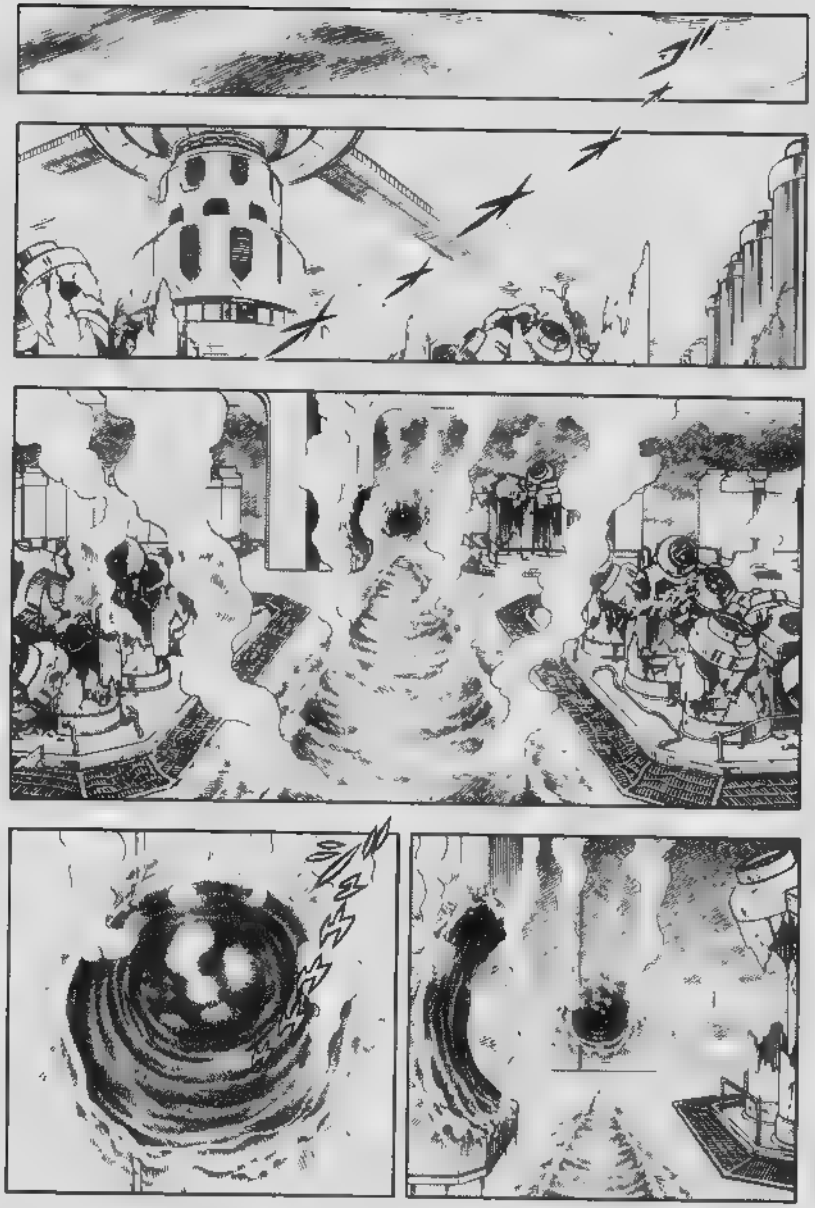
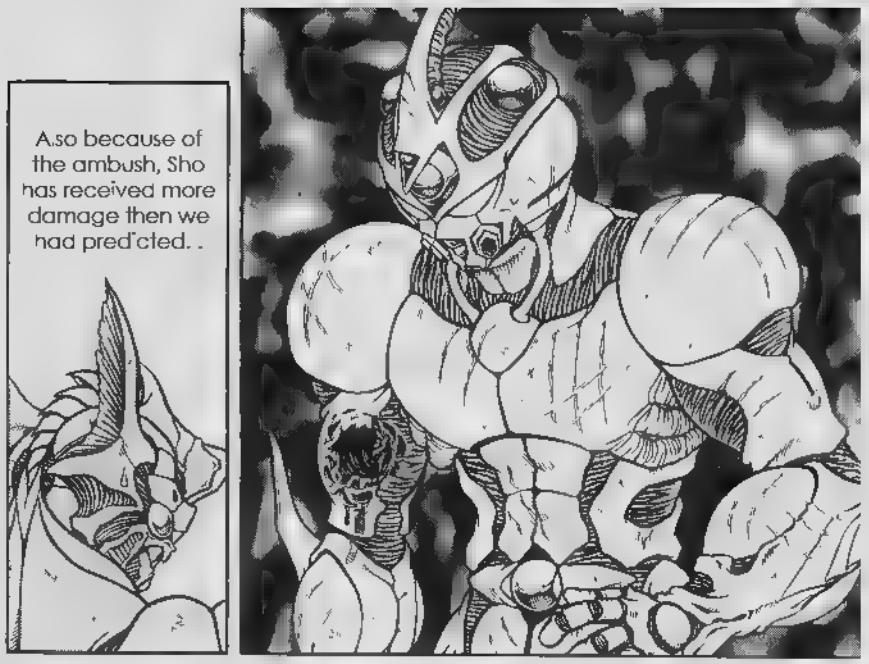
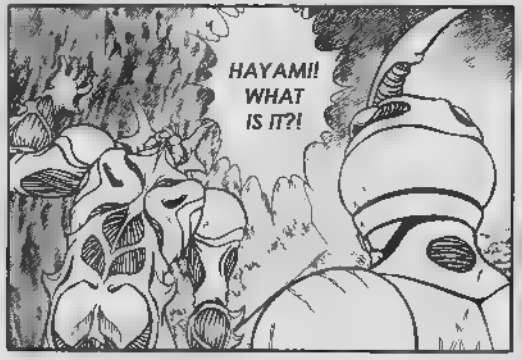
.
. Not even a single part of them remains..
You did it.
.I do not even possess a sufficient force to eliminate those bastards..
No. It is all your own merit
I shou d thank you for distracting them in our plan .
It pleases me that I was able to contribute my own smal part





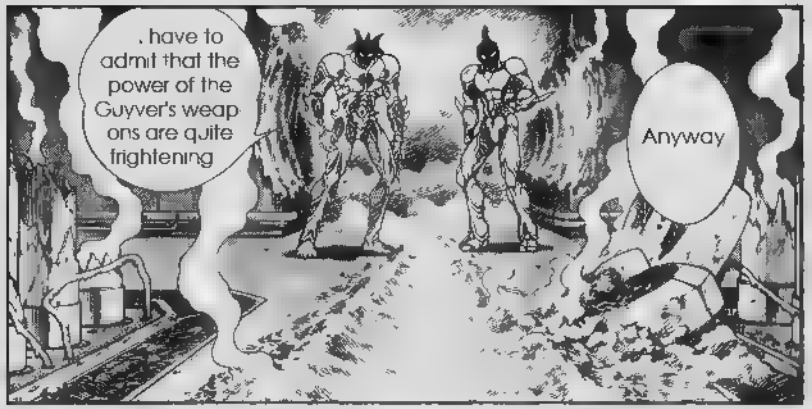
Also because of the ambush, Sho has received more damage then we had pred'cted. .



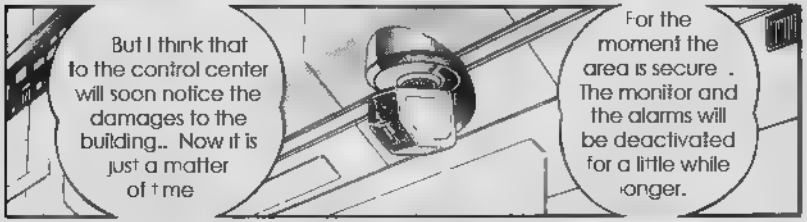
HAYAMI! WHAT IS IT?!

!!

. perhaps just ittle fatigue due to the use of my freezing ability. .
Ah . nothing .



. have to admit that the power of the Guyver's weap ons are quite frightening
Anyway

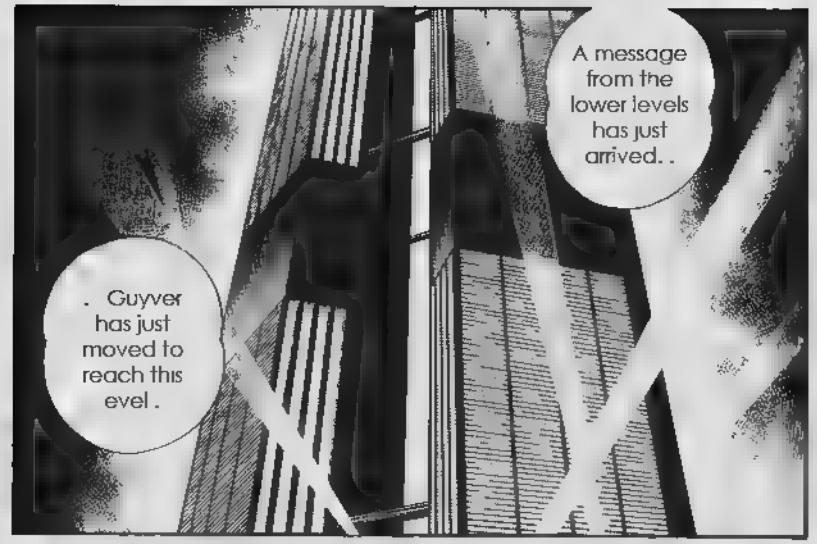


But I think that to the control center will soon notice the damages to the building.. Now it is just a matter of t me
For the moment the area is secure . The monitor and the alarms will be deactivated for a little while onger.

However it does not seem to me that we have that luxury, so do not blame yourse f.
That would have helped ..

Let's proceed!

The fault is mine .
.. I should have restrained my power better .



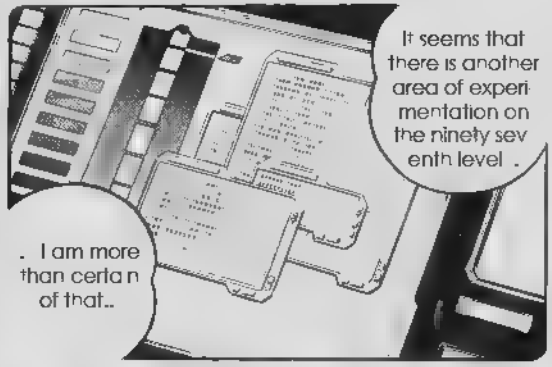
A message from the lower levels has just arrived. .
. Guyver has just moved to reach this evel .

If they realize that we have them trapped, they may at tempt to escape.
We wil not fail.
Oh .. Real y?

. so that our welcome guests do not sl'p through our net of sur ve'llance.
I placed operatives in a l the cru cial points. .

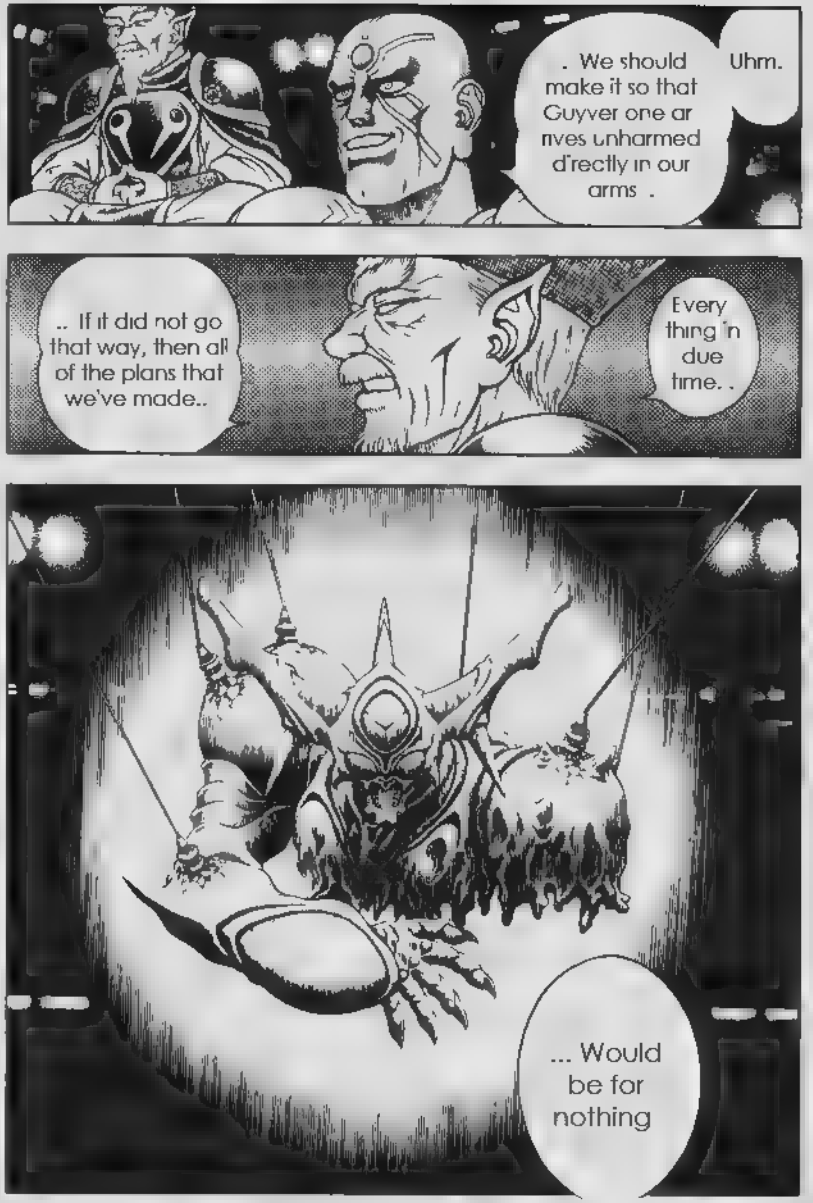
Now that I have moni tored th's terminal .
But .

It is there that they are hold ing Aptom!

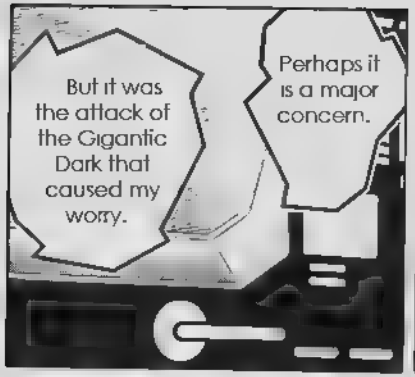


It seems that there is another area of experi mentation on the ninety sev enth level .
. I am more than certa n of that..

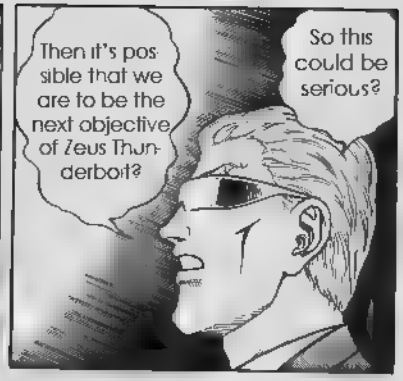
Meanwhile in Arizona,
In The central seat of Cronos.



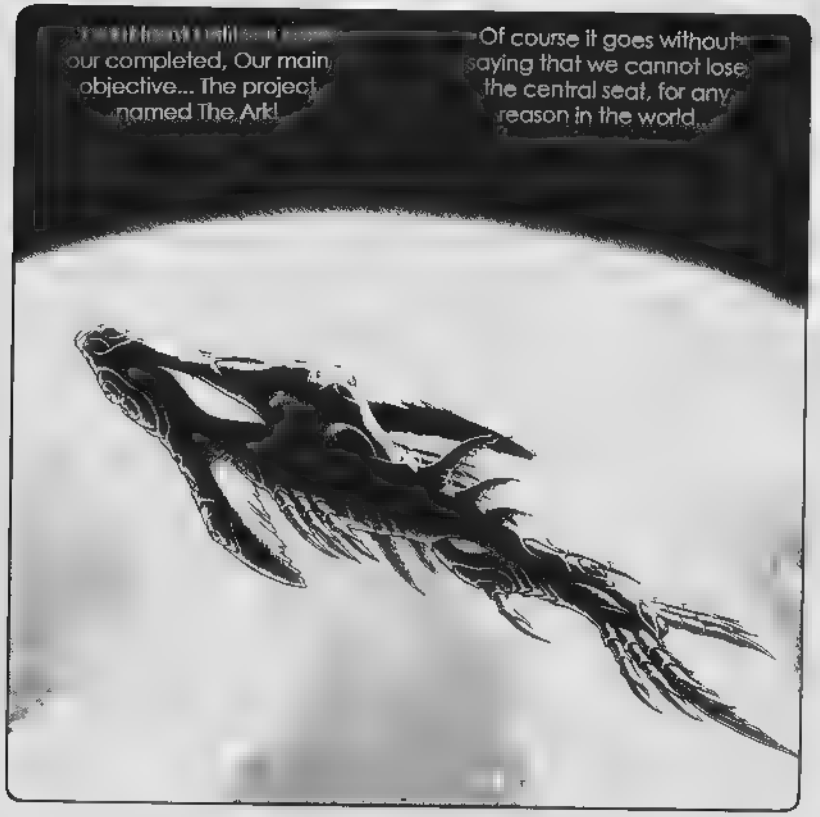
Uhm.
. We should make it so that Guyver one ar rives unharmed directly in our arms .
.. If it did not go that way, then all of the plans that we've made..
Every thing in due time. .
... Would be for nothing



But it was the attack of the Gigantic Dark that caused my worry.
Perhaps it is a major concern.



Then it's possible that we are to be the next objective of Zeus Thunderbolt?
So this could be serious?

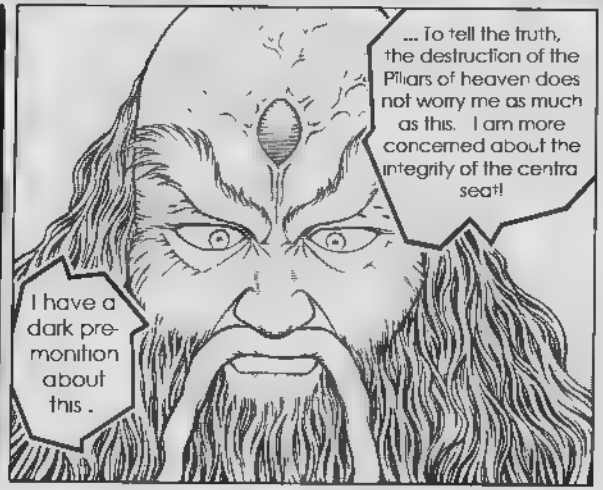


our completed, Our main objective... The project named The Ark!
Of course it goes without saying that we cannot lose the central seat, for any reason in the world.

Indeed
He is intending to return here?

Its more than likely. . I am thinking that it is pointless for me to remain here.
But Washington of all places?

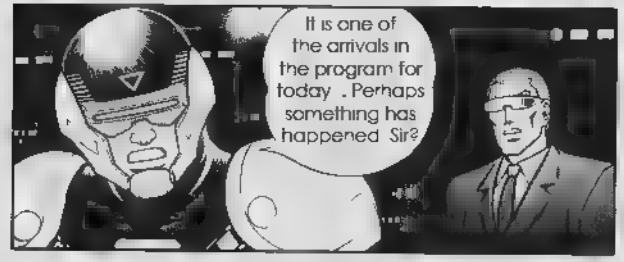
!!



... To tell the truth, the destruction of the Pillars of heaven does not worry me as much as this. I am more concerned about the integrity of the central seat!
I have a dark premonition about this .

It finished the inspection of the project for the construction of the base in Australia.. His return was expected for today .
It's been announced as Doctor Chan of the department for development .

Wait!
Who is on board?



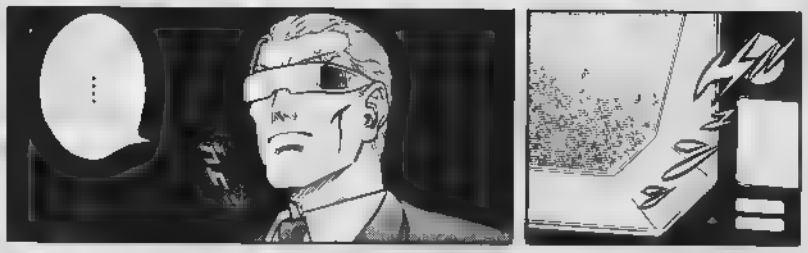
It is one of the arrivals in the program for today . Perhaps something has happened Sir?

?
No . Nothing special

ALLOW ENTRY.

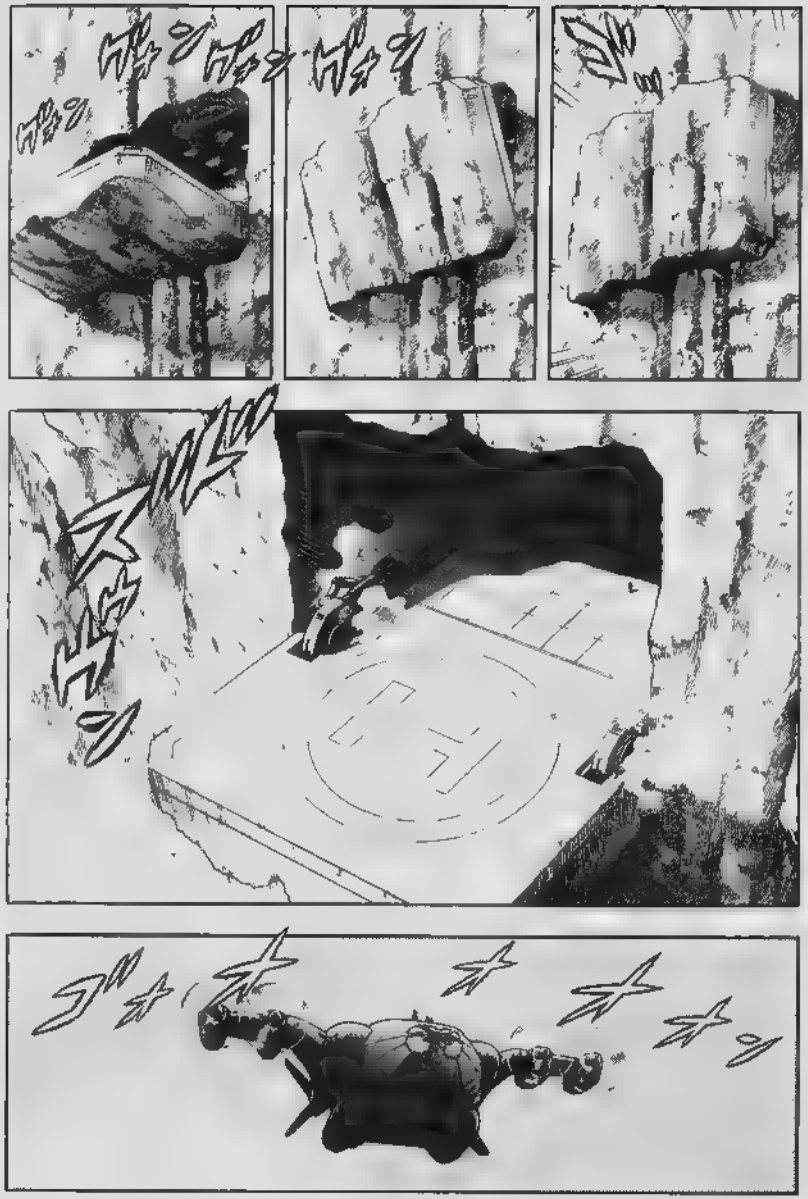
. . I recommend. . that you strengthen the field of defence of the base .
In any case, I will reach you this afternoon

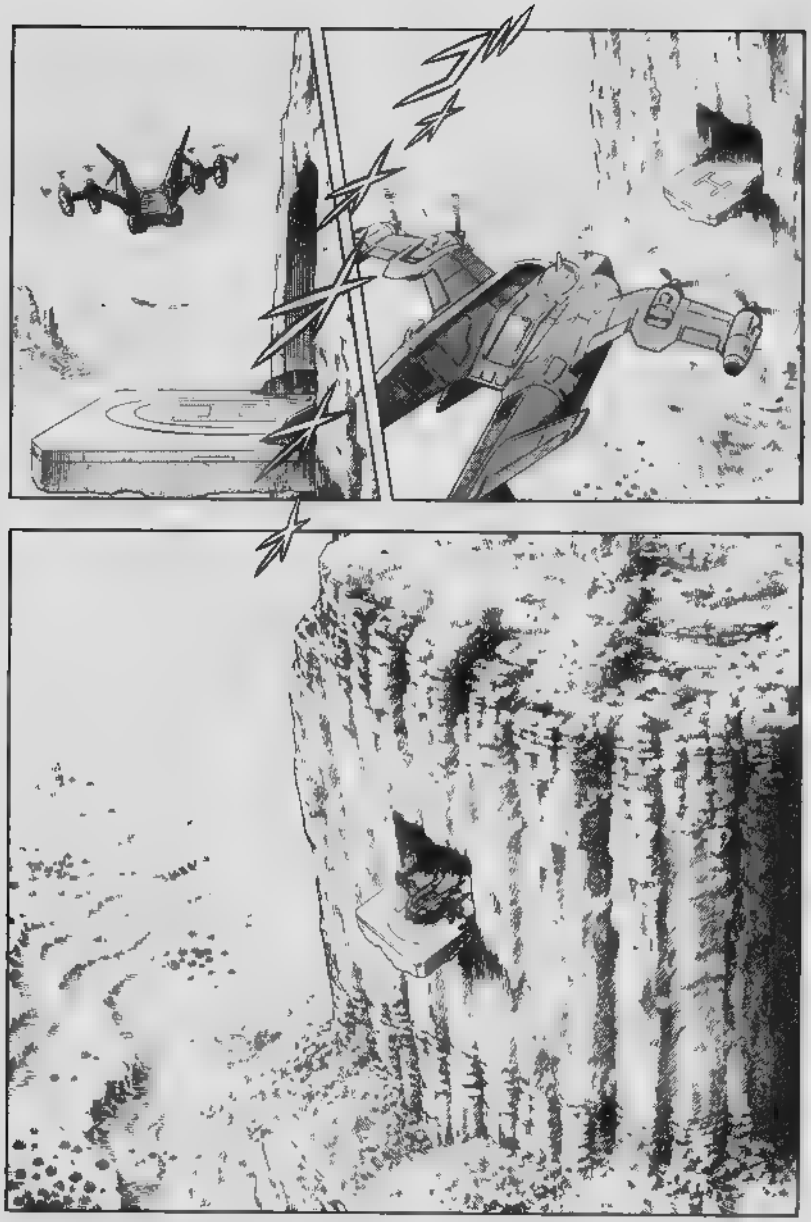
. We await with pleasure your return
As you command



. . .

. . I will open the landing bay on the cliff side!
The transportation for the VIP is now approaching .





?

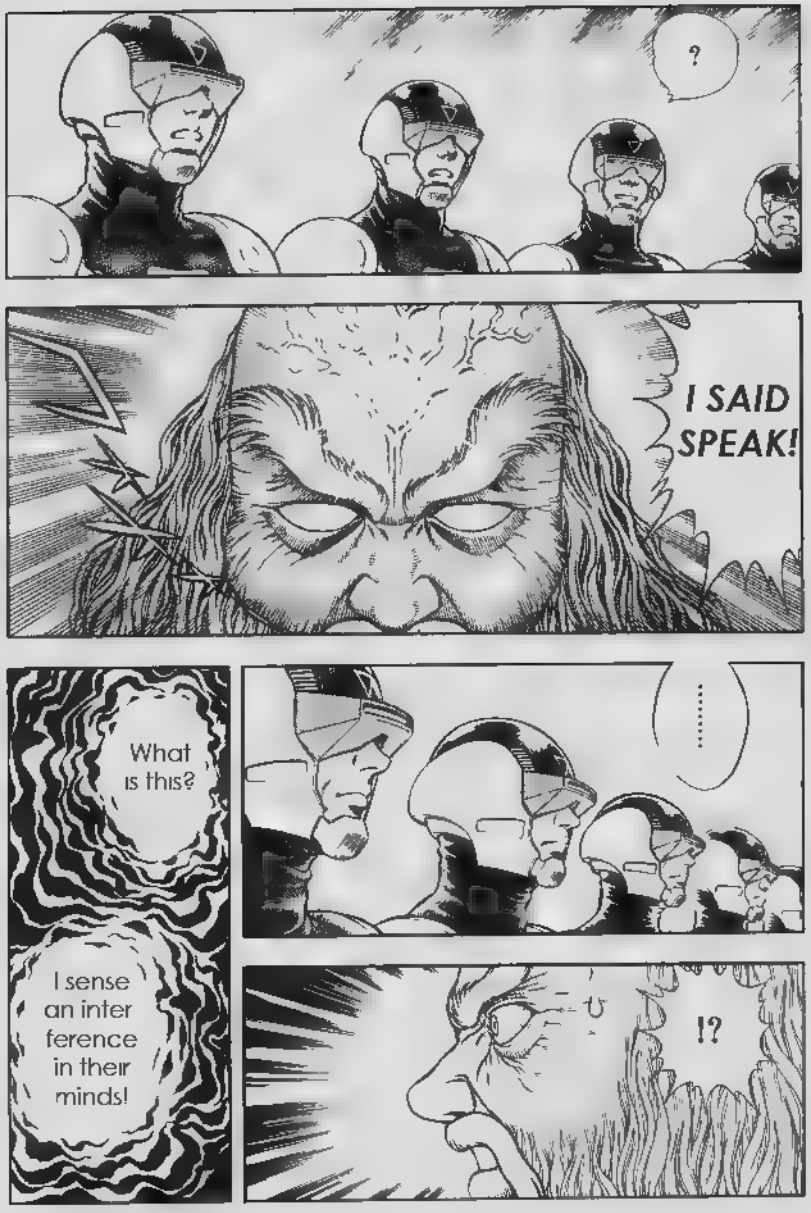
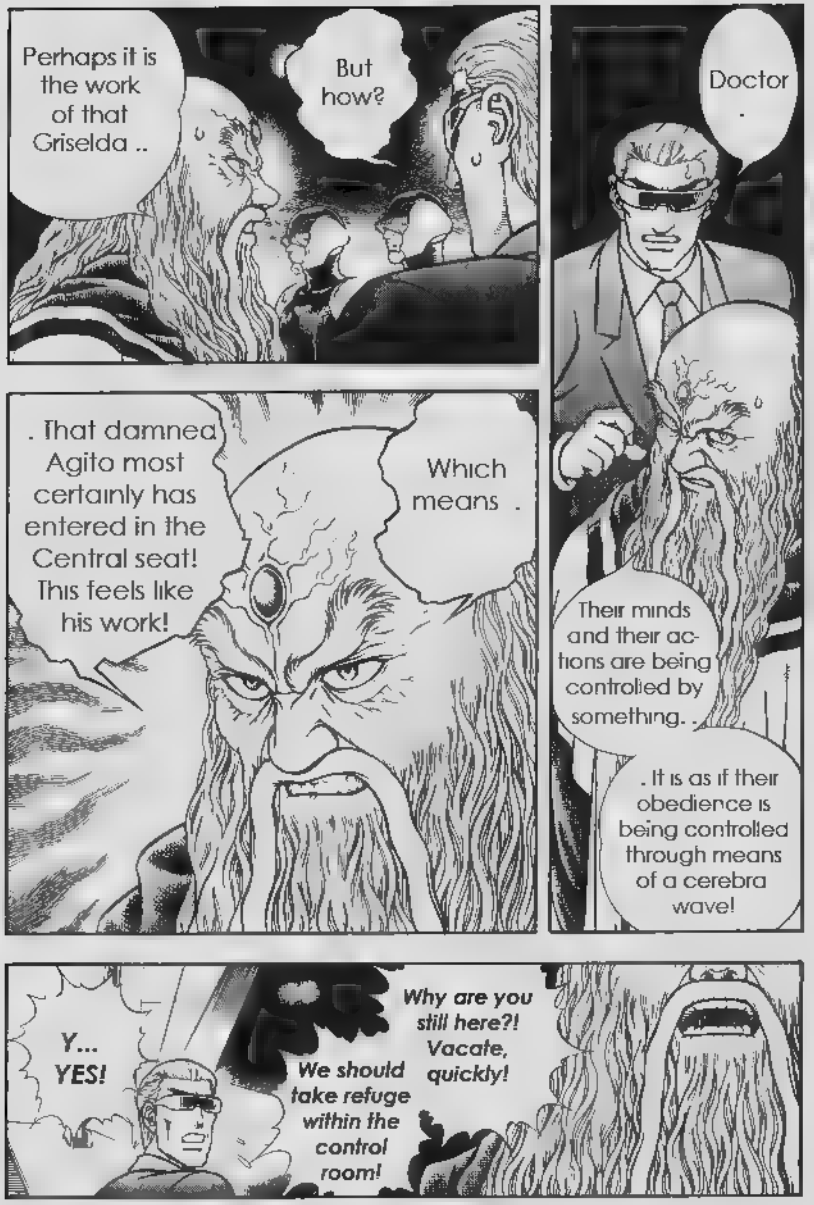
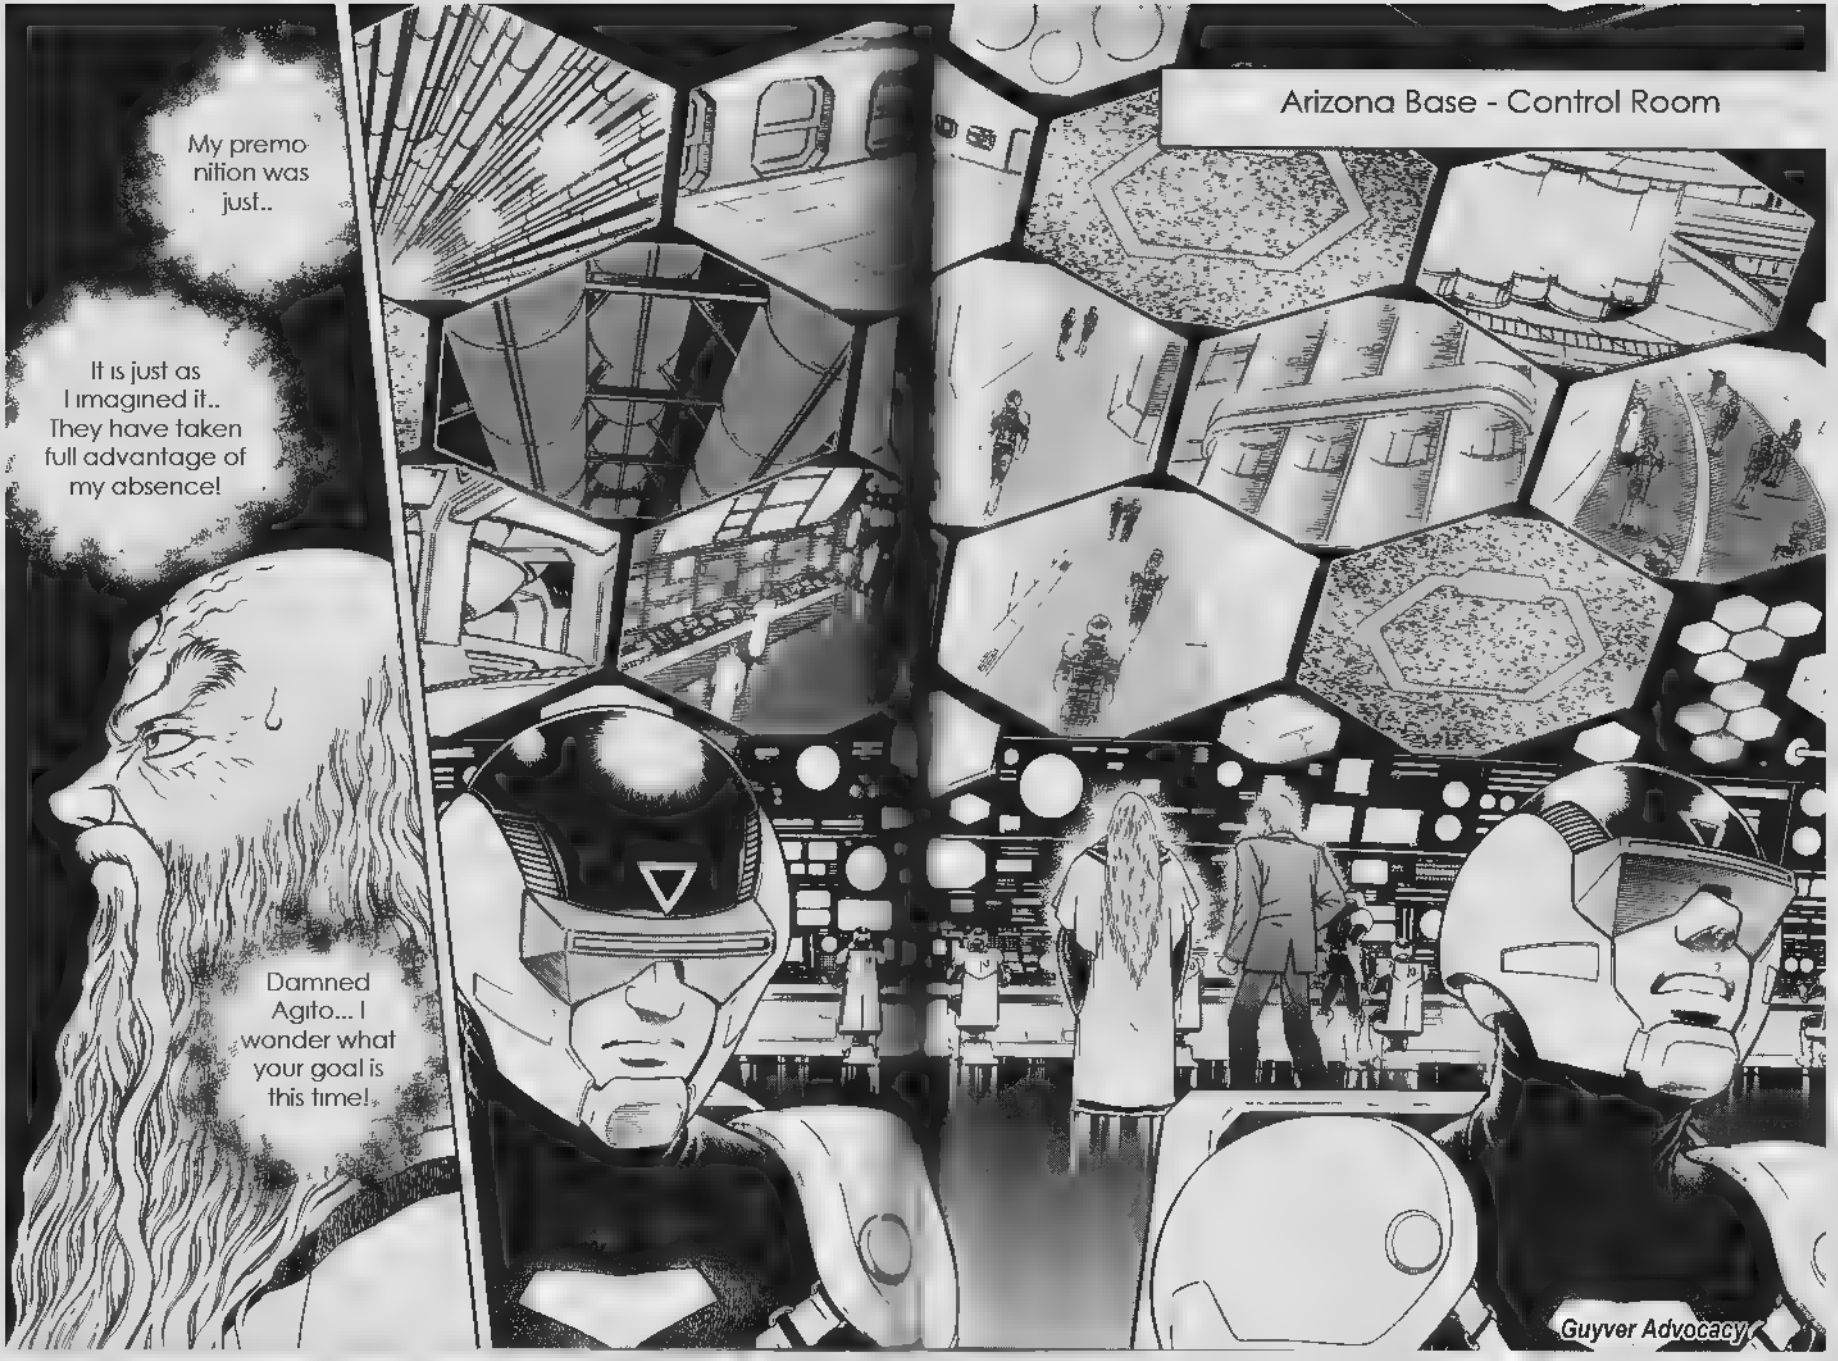
IT APPEARS TO BE BLOOD!
OH...



?
I SAID SPEAK!
What is this?
I sense an inter ference in their minds!
.....
!?



Perhaps it is the work of that Griselda ..
But how?
Doctor .
. That damned Agito most certainly has entered in the Central seat! This feels like his work!
Which means .
Their minds and their actions are being controlled by something. .
. It is as if their obedience is being controlled through means of a cerebra wave!
Y... YES!
We should take refuge within the control room!
Why are you still here?! Vacate, quickly!



My premonition was just..
It is just as I imagined it.. They have taken full advantage of my absence!

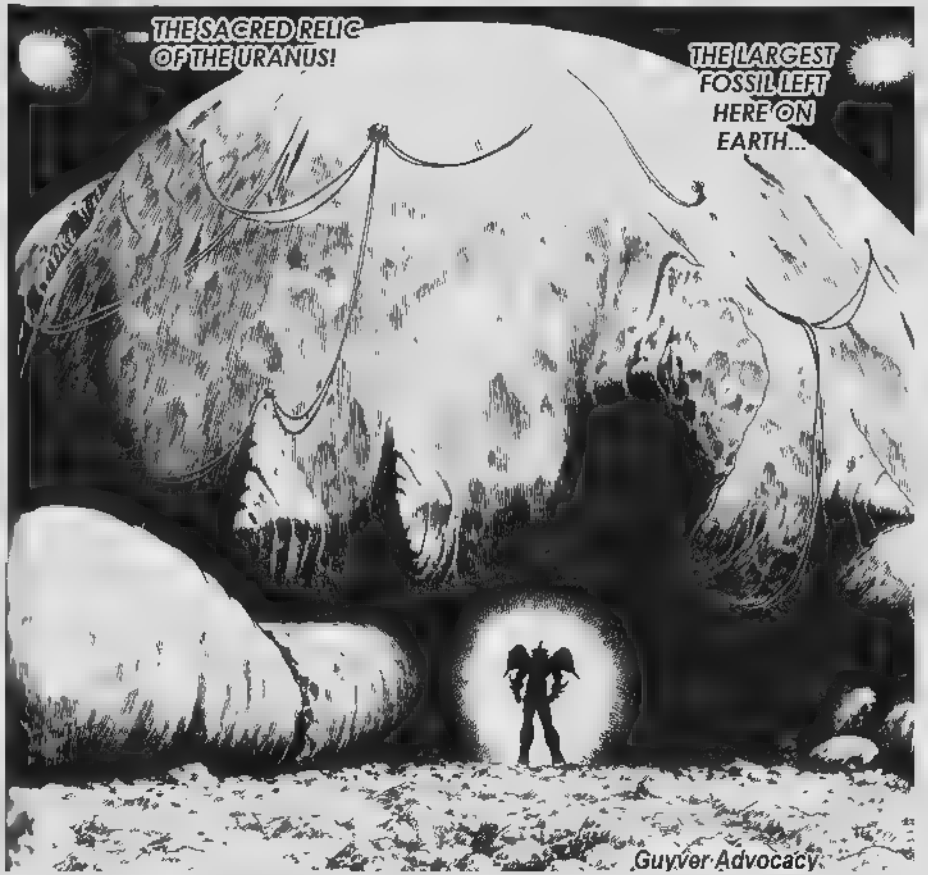
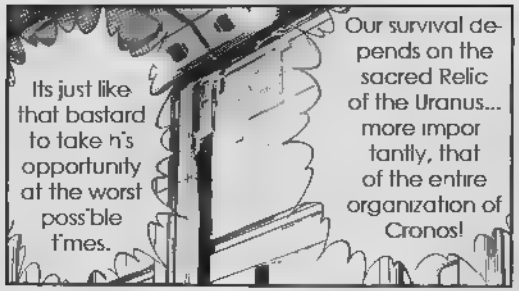
Incredible .
. And to think they are supposed to be our chosen troops .
They are powerless against them. .
But how!?
The Hyper Zoanoids are being influenced by her cerebral wave and it's causing them to lose a great deal of energy!
The cause of this is Grise da.
. It is clear that our men have been easily subdued and dominated by the mind of that damned individual!
Indeed. . It appears, I am not the only one here who qualifies as a zoalord .

Chapter 112
OBJECTIVE: THE SACRED RELIC OF THE URANUS!

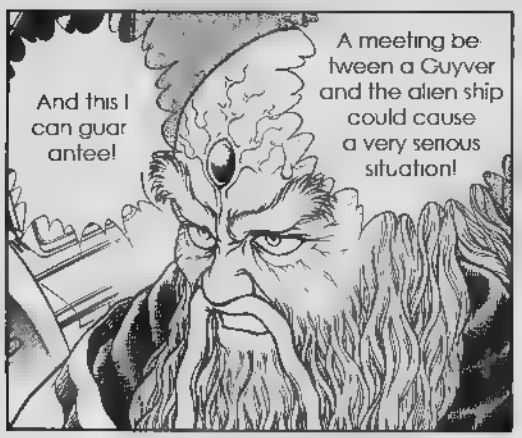


Guyver Advocacy

I BEG YOU... PLEASE RE-CONSIDER THIS!
DOCTOR!

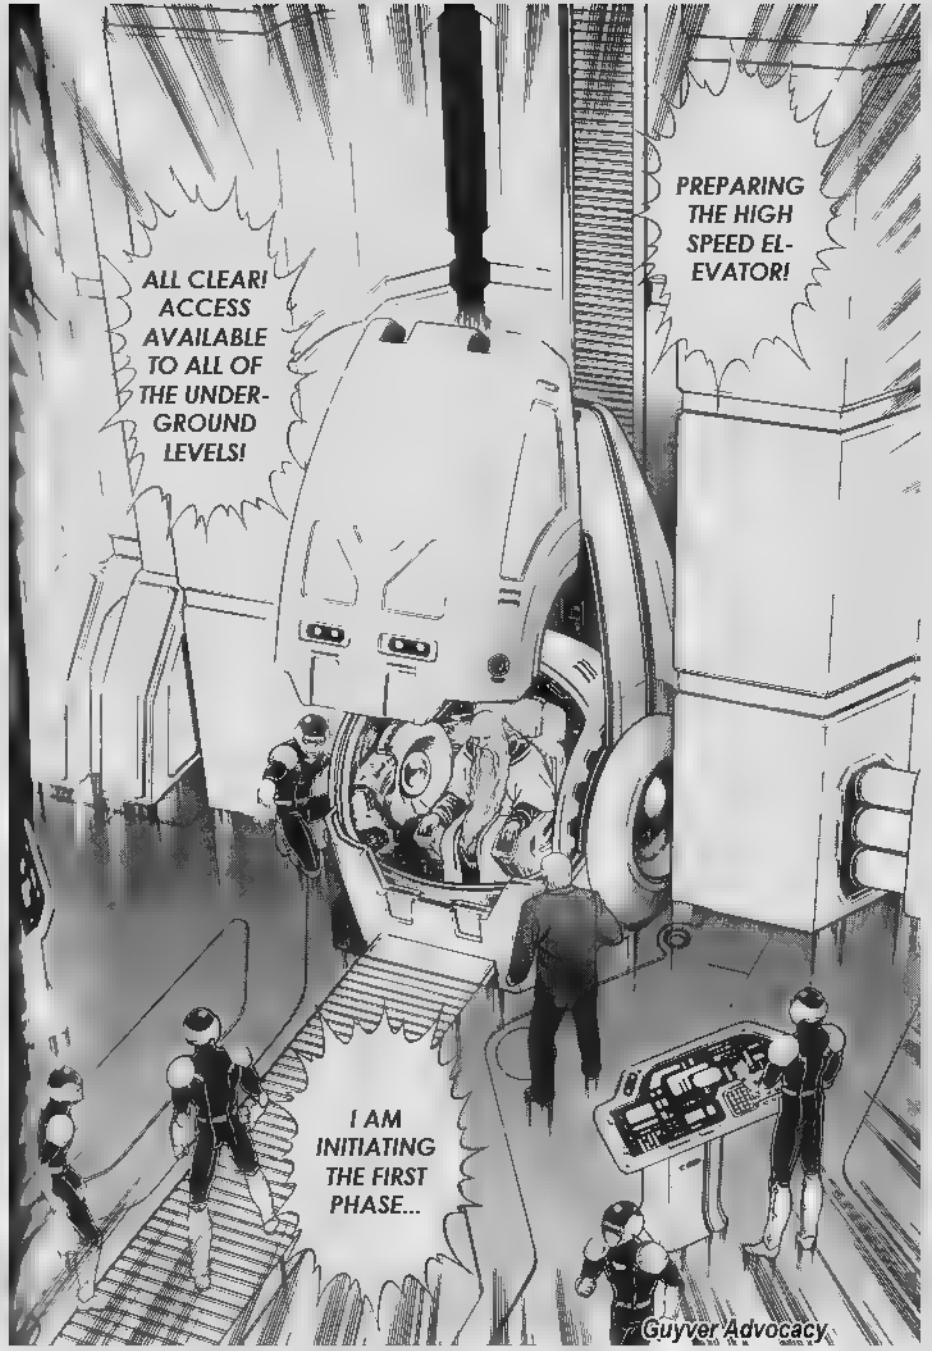


Its just like that bastard to take h's opportunity at the worst poss'ble t'mes.
Our survival depends on the sacred Relic of the Uranus... more impor tantly, that of the entire organization of Cronos!



And this I can guar antee!
A meeting be tween a Guyver and the alien ship could cause a very serious situation!

IT IS NOT NECESSARY THAT YOU FACE GIGANTIC DARK.
ENOUGH!

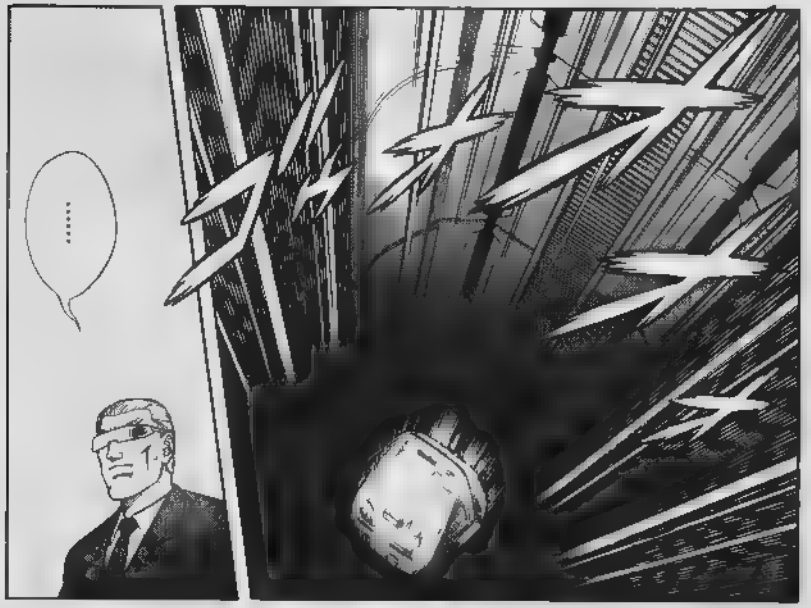


ALL CLEAR! ACCESS AVAILABLE TO ALL OF THE UNDER-GROUND LEVELS!
PREPARING THE HIGH SPEED EL-EVATOR!
I AM INITIATING THE FIRST PHASE...
Guyver Advocacy

. . He also desires to discover what is hidden inside it..
It is not difficult to guess as to the true objective of Agito .
It is likely ..
... But it is not only this .
This could become a vital matter that will decide the outcome of our conflict.
In other words.
... AND WITHOUT WASTING ANY TIME HE HAS PROCEEDED DIRECTLY TOWARDS THE UNDERGROUND LEVEL!
HE KNOWS IT TOO.

. The Relic is different from the anc ent ruins of the Mount Minakami, to my knowledge it is not functional
Before you leave please answer this one question.
.. I assume that is what you really wanted to ask, yes?
And that is true for that instance, after thousands of years, all of the remaining fossils have lost all manner of life signs except this one
So then..
. . It is possible that he could possibly extract further information then that which we already have from the Relic!
Nevertheless you should not forget that, thanks to our research on the data gathered from the relic of those ruins.
. It was possible to create new forms of zoanoid!
.. He is able to bond with the ship in a similar way to the aliens that created it
That must be Makishima's intention.

PROCEED-
ING TO THE
ACCELERA-
TION OF THE
ELEVATOR!



.....

YOU!
INITIATE
THE HIGH
SPEED EL-
EVATOR!
THEREFORE
THERE IS NOT
A MOMENT

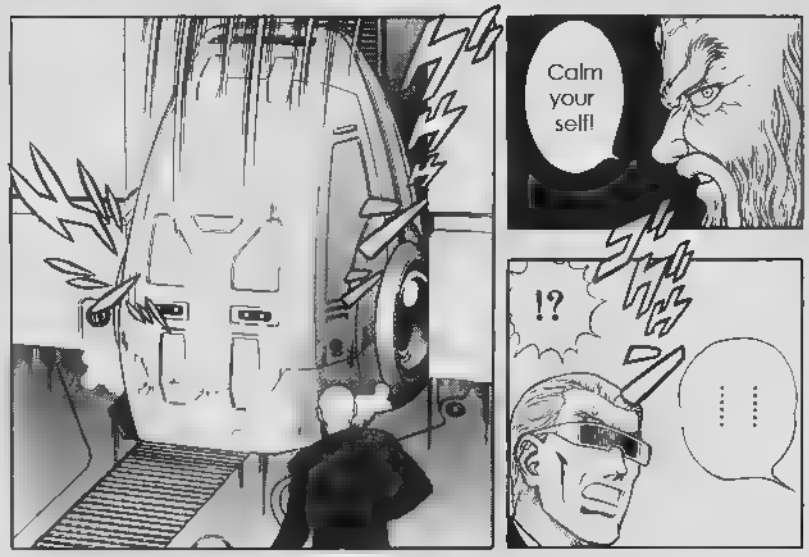
WHAT WILL
HAPPEN TO
CRONOS IF THE
WORST SHOULD
HAPPEN TO
YOU?!
PLEASE
REMEMBER
THAT THIS IS
THE GIGANTIC
DARK!



Calm

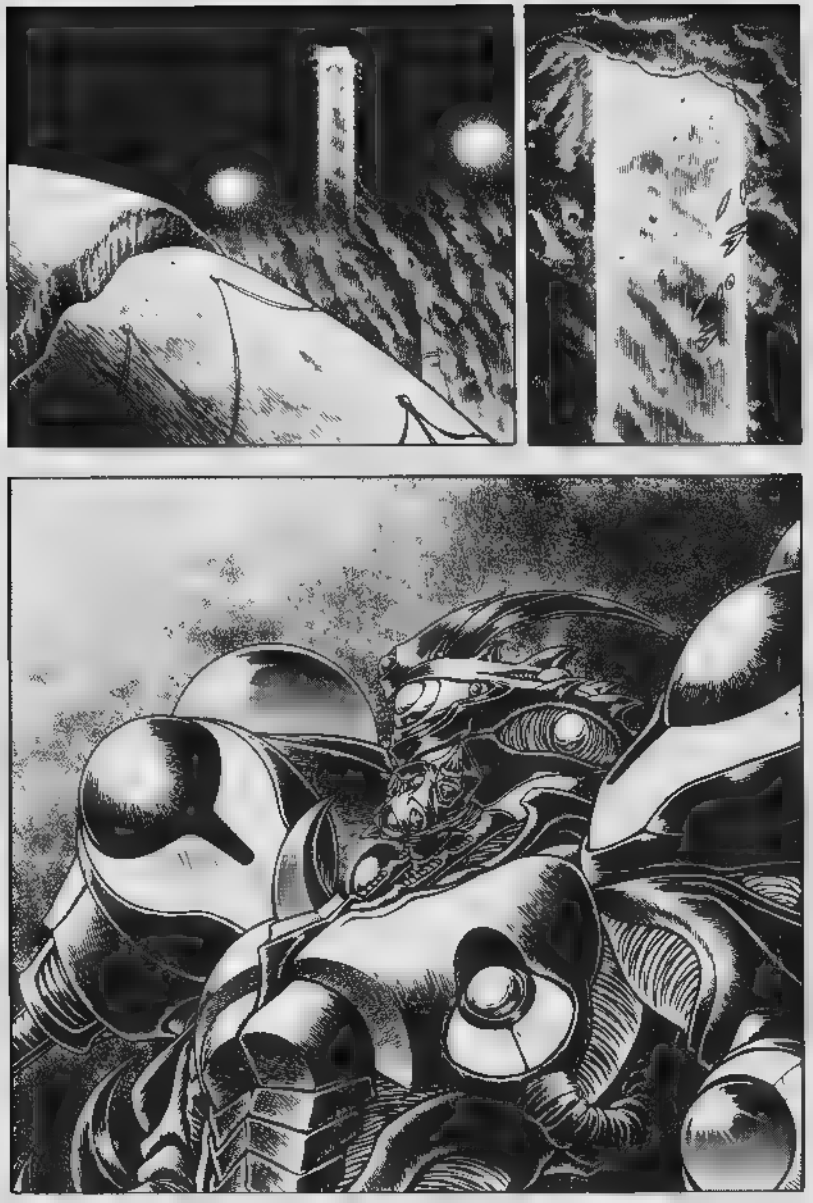
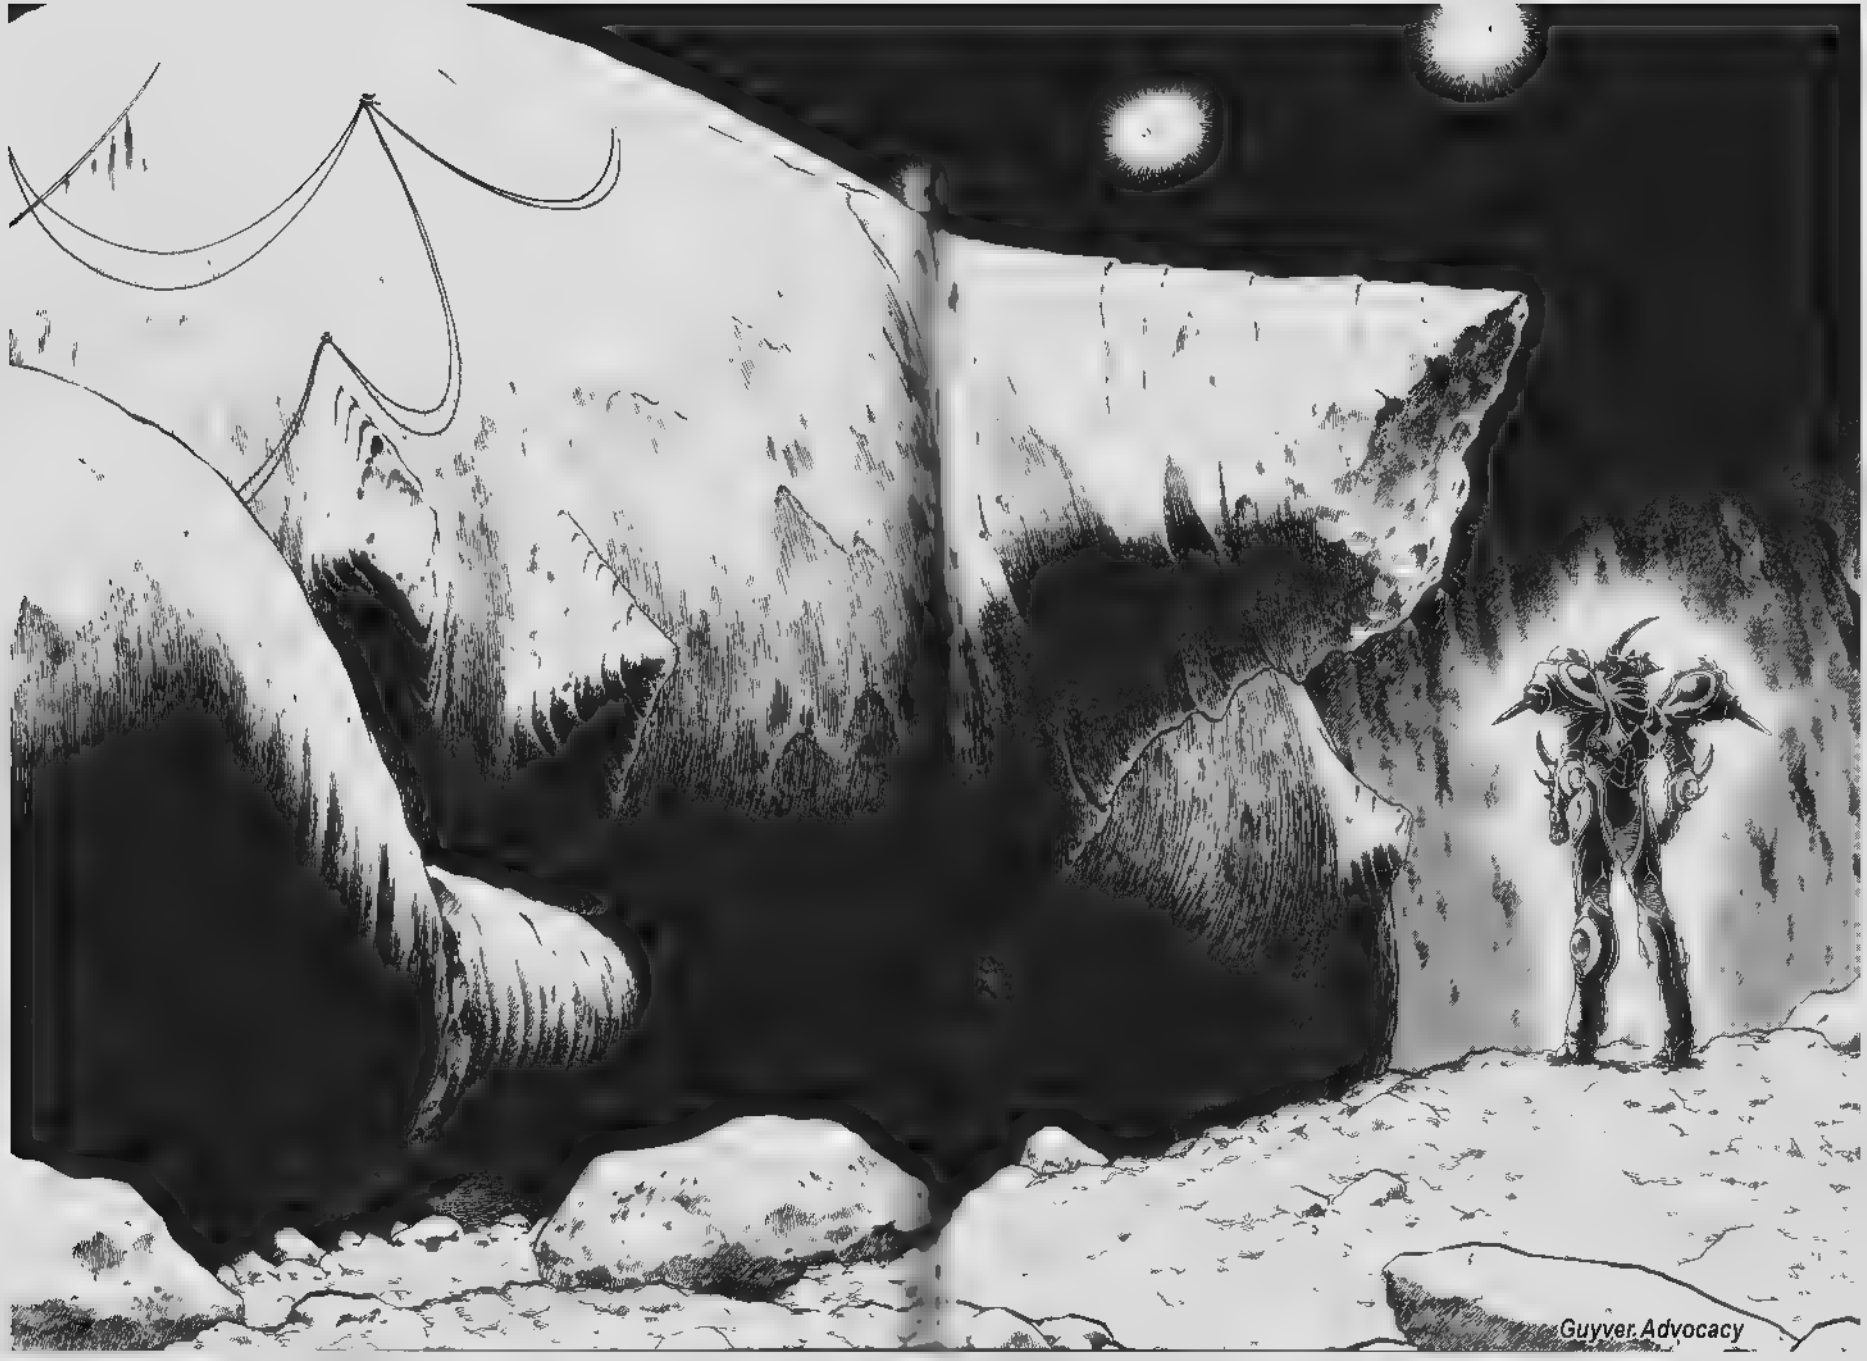
self!
!?
.....

.. It is possible that someone will intervene .
You mean that...
Do not worry! I have not intention of confronting it by myself. .

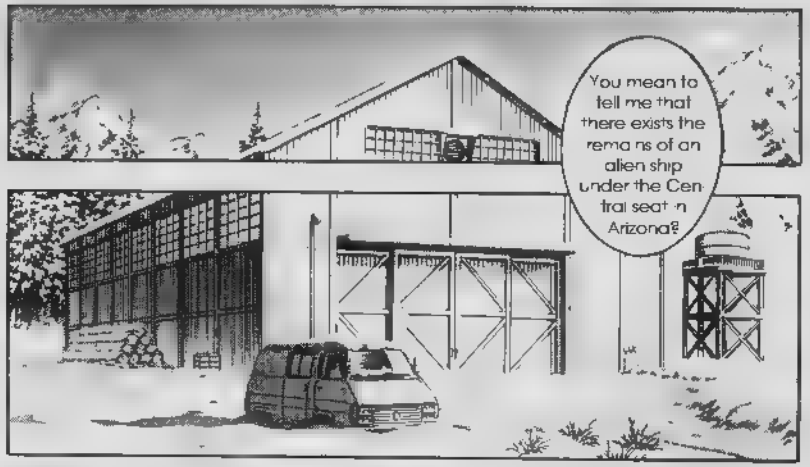
I hope that..
you are safe...
Agito .





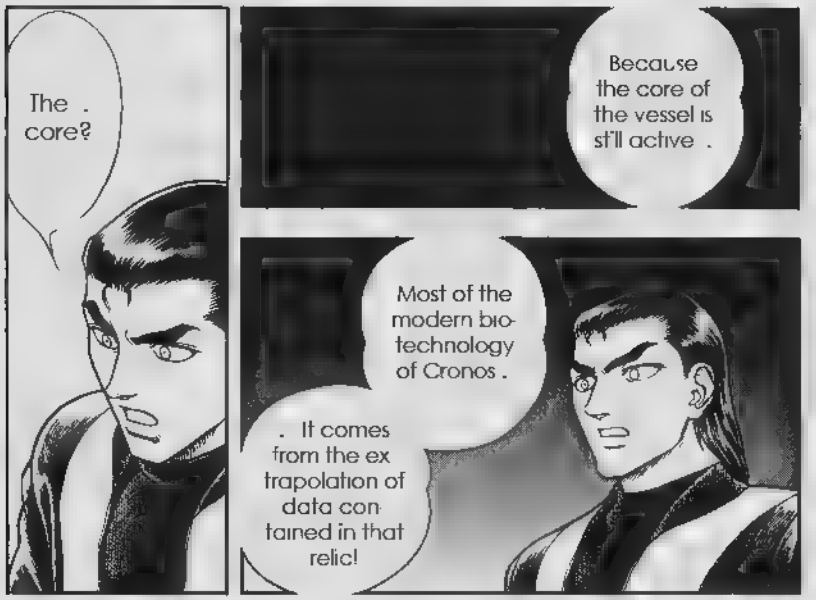
Guyver Advocacy

...
the possibility of another Gigantic..
I cannot believe it.



You mean to tell me that there exists the remains of an alien ship under the Central seat in Arizona?
To be precise, it is a fossil. .

Nothing has, or can, enter this fossil without the same armour you possess for battle. .
Unfortunately it is completely different from the alien ship that you saw in Japan .



The . core?
Because the core of the vessel is still active .
Most of the modern biotechnology of Cronos .
. It comes from the extrapolation of data contained in that relic!

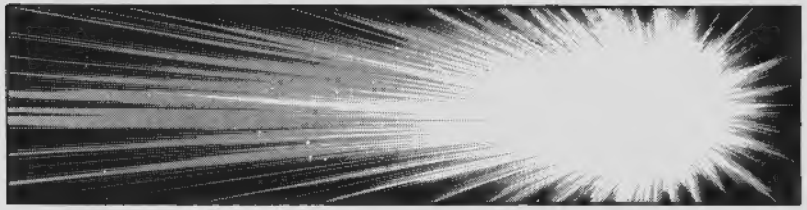
. Something that not even the highest ranked operative has been able to access.
Yes ..

There it's like a large room in the central body of the ship.
.. And it seems that there is a spherical object similar to that on your armour's forehead installed composed of a weird metalic substance
Then one still exists active on earth!
IT IS LIKE THE HEART OF THE ALIEN SHIP...
THE NAVIGATION METAL!

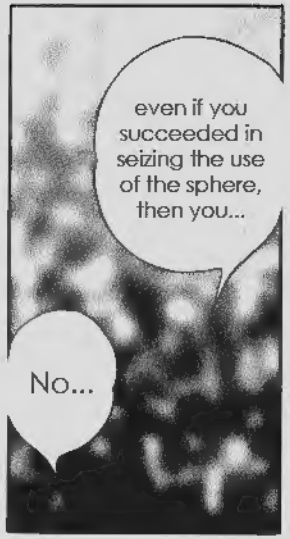
Yes, but how .
It's been said that the Zoalord Balcus has touched that metallic sphere.
. managing to scrutinize the memory of the aliens that are contained ..
.. I understand the metallic sphere. . is still found in the alien ship?
I believe so .
?
But all that is of no consequence . it's absurd, don't you think?
Therefore I do not think that they have dismantled it or even transferred it to another location...
The Zoalords have transformed it into a sort of living sanctuary

...
We press on ahead and carry out our goal...
While Griselda and the others are engaged in combat...

Then
...



!?



even if you succeeded in seizing the use of the sphere, then you...
No...

Heh... is that so...

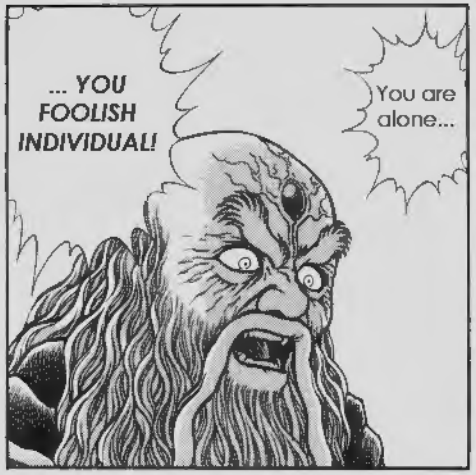
You wouldn't be thinking of...
!?

... I COULD RIP THE WORLD FROM THE HANDS OF CRONOS!

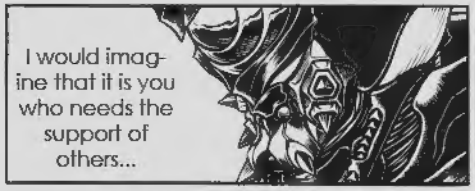
Guyver Advocacy

... Against the Gigantic Dark you are unable to do anything!
You can't seriously expect to face me alone...

... HE IS NOT COMPLETELY ALONE!
YOU THINK SO...



... YOU FOOLISH INDIVIDUAL!
You are alone...



I would imagine that it is you who needs the support of others...

... Finally we meet again!
Oh mighty Doctor Balcus...

DO NOT DARE TO TAKE ANOTHER STEP TOWARDS THE SHIP!
